## PROFESSIONAL SUMMARY

Full Stack Software Developer and UI/UX Designer with proven, production-level experience designing and delivering web and mobile applications across the entire stack. I design intuitive user interfaces in Figma, translate them into pixel-perfect responsive frontends using React.js and TypeScript, and wire them to scalable NestJS backends with PostgreSQL. I have served as Frontend Lead and Technical Lead on the Beyond Sports Platform and built AgroConnect, a full-stack agricultural marketplace, demonstrating depth in both design and engineering. I bring a strong visual sense, user-centred thinking, and the technical ability to implement designs exactly as envisioned. Passionate about building beautiful, functional software that creates meaningful impact across Africa.

## TECHNICAL SKILLS

| UI/UX & Design                                                                                                                                                                                                         | Frontend                                                                                                                                                                                                   | Backend                                                                                                                                                                                     | Databases                                                                                                                                              | Tools & Practices                                                                                                                                                                                                                            |

## TECHNICAL PROJECTS

### Beyond Sports Platform — Frontend Lead & Technical Lead

Stack: React.js · React Native (Expo) · NestJS · Prisma ORM · REST APIs · PostgreSQL · Figma · DigitalOcean

- Designed the UI/UX of the platform in Figma, creating wireframes, high-fidelity mockups, and a consistent design system across web and mobile.
- Translated Figma designs into pixel-perfect, responsive React.js web interfaces and React Native mobile screens.
- Developed and maintained scalable RESTful APIs using NestJS with PostgreSQL database management via Prisma ORM.
- Built cross-platform mobile features using React Native (Expo), delivering consistent experiences on iOS and Android.
- Collaborated in an Agile team environment using Git-based version control, code reviews, and CI/CD pipelines on DigitalOcean.
- Debugged and resolved software defects across web and mobile surfaces, monitoring backend services using PM2 and Nginx.

### AgroConnect — Farm Input Marketplace — Full Stack Developer

Stack: React.js (Vite) · React Native (Expo) · NestJS · Prisma ORM · PostgreSQL (Neon) · Figma · EAS Build

- Designed the admin dashboard, mobile app screens, and user flows in Figma before implementation, ensuring a consistent and intuitive user experience across platforms.
- Built a full-stack agricultural marketplace comprising a React/Vite admin web dashboard, NestJS/Prisma/Neon backend, and an Expo/React Native mobile app.

- Wired real backend data into admin dashboard, transactions, and analytics pages, replacing static mock data with live aggregation.
- Implemented secure profile management including avatar uploads via Multer, and resolved production-safe Prisma schema migrations on a live Neon database.
- Debugged OTP email delivery (SendGrid), dealer registration validation, and Android cleartext-traffic policy issues in standalone builds.
- Produced and distributed installable Android builds using EAS Build with configured `eas.json` build profiles for internal APK distribution.

### Mayondo Wood & Furniture Business System

Stack: React.js · Node.js · Express.js · MongoDB · Figma · Netlify

- Designed high-fidelity UI/UX mockups and wireframes in Figma covering all application screens and user flows.
- Translated Figma designs into pixel-perfect, responsive React.js interfaces with consistent component structure.
- Built scalable RESTful APIs using Node.js and Express.js with MongoDB and secure RBAC with JWT authentication.
- Optimised application performance, resolved software defects, and deployed to Netlify with full CI/CD workflow.

### Grocery Buddy Web Application

- Built a full-stack responsive grocery management web application with authentication, personalised dashboards, and real-time inventory updates.
- Designed the user interface with a focus on simplicity, usability, and a clean visual experience across desktop and mobile.
- Developed and integrated RESTful APIs with reusable React.js frontend components using HTML5 and CSS3.
- Implemented CRUD functionality, debugged software defects, and maintained well-documented, clean code throughout.

## EDUCATION

---

### Refractory Academy

Advanced Certificate of Apprenticeship in Software Engineering  
Certificate in Software Engineering

Kampala, Uganda  
2025 – 2026 / 2025

## CERTIFICATIONS

---

Professional Soft Skills Certification — 2025

## SOFT SKILLS

---

Problem-Solving & Debugging • Team Collaboration • Communication Skills • Attention to Detail • Adaptability & Continuous Learning • Time Management in Agile Environments
